

ABSTRACT

[00054] A game ball including a casing and a lacing. The casing has a laced region. The lacing is coupled to the laced region of the casing. The lacing has an
5 exposed surface comprised of an outer material that is compressible, resilient, and tactile. The outer material has a modulus of elasticity of between 14 and 170 kg/cm² and a tensile strength between 100 and 650 kg/cm². At least a portion of the lacing can have an exposed pebbled surface.
